

Big Jim Open Gear Spray Grease

PRODUCT DESCRIPTION:

JAX Big Jim is an extremely thick, high-cling open gear spray grease with added moly and graphite for long-term lubrication. It was developed by JAX in response to market demand when a product that had been used for years by several customers was being discontinued. After extensive field testing and interviews with several OEMs about equipment applications, the final formula was developed and the result is far superior to the original.

PRODUCT BENEFITS:

JAX Big Jim was designed to cut down on the need for re-application throughout the day, which was a common complaint about the original product. The addition of moly and graphite grease, with its high dose of solids, provides long-lasting antiwear and extreme pressure performance. The new formulation also gives superior moisture resistance and the thick consistency that resists squeeze-out or sling-off.

APPLICATION:

JAX Big Jim is ideally suited for heavy-duty equipment such as forestry haulers, scrapers, grinders, or any equipment that is exposed to outdoor environments and heavy loads. Big Jim is also excellent for use in ports and docks where parts are exposed to weather.

TECHNICAL DATA:

| | |
|-------------------|-----------------------|
| Propellant: | Propane and n-Butane |
| Flash Point: | N/A |
| Pour Point: | N/A |
| Spray Pattern: | Shotgun Blast |
| Viscosity: | N/A |
| Texture: | Rich Black Heavy Film |
| Appearance: | Black Tar |
| Consistency: | Very Heavy |
| Specific Gravity: | .76-.80 |

AEROSOL PACKAGING:

11 oz. net weight aerosol cans (12/case) – Part # JAX206

This product is an excellent replacement for Chevron Open Gear Grease
