

Electrical Contact Cleaner Non-Flammable Formula

PRODUCT DESCRIPTION:

Electrical Contact Cleaner Non-Flammable Formula is an environmentally-friendly, quick-drying, non-flammable product that is formulated without CFCs. Electrical Contact Cleaner Non-Flammable Formula is odorless, nonstaining, and will not harm most forms of insulation, metals, plastics or elastomers. In field tests and lab analyses, Electrical Contact Cleaner Non-Flammable Formula has proven to be one of the most compatible products for its designated purpose.

Electrical Contact Cleaner Non-Flammable Formula cleans oil, dust, lint, dirt and varnish from electrical and electronic components.

Electrical Contact Cleaner Non-Flammable Formula has a dielectric strength exceeding 34 kV and is NSF K2-registered as a solvent for cleaning electronic instruments. Product use will help prevent electrical failures and restore efficiency.

IMPORTANT: Although aerosol is nonflammable, pooled liquid can ignite. Allow accumulated liquid to evaporate before re-energizing equipment.

BENEFITS:

- Non-flammable
- No flash point
- Non-corrosive
- Non-conductive
- Safe on plastics and metal

TECHNICAL DATA:

Propellant:	1,1,1,2-tetrafluoroethane
Flash Point:	No Flame Extension
Spray Pattern:	Mist
Texture:	Fast Evaporating Mist
Appearance:	Clear Liquid
Consistency:	Light
Specific Gravity:	0.77-0.79 for Concentrate, typical

AEROSOL PACKAGING:

14 oz. net weight aerosol cans (12/case) – Part # JAX124

Electrical Contact Cleaner Non-Flammable

NSF International / Nonfood Compounds Registration Program

RE: JAX ELECTRICAL CONTACT CLEANER Non-Flammable Formula (AEROSOL)
Category Code: K2
NSF Registration No. 133892

Dear Ms. Patty Riek:

NSF has processed the application for Registration of **JAX ELECTRICAL CONTACT CLEANER Non-Flammable Formula (AEROSOL)** to the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (21 CFR 170.101) which are available at <http://www.nsf.org>. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR 170.101 for appropriate use, ingredient and labeling.

This product is acceptable for use as a solvent for cleaning electronic instruments and devices (K2), which will tolerate aqueous cleaning solutions in and around food processing areas, where its use is not intended for direct food contact. Before using this compound, food products and packaging materials must be removed from the area or carefully protected. This compound must be used in a manner so that all odors associated with the compound are dissipated before food products or packaging materials are re-exposed in the area.

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration 1 appear on the NSF-approved product label, and the registered product name is included in the current NSF White List of Nonfood Compounds at the NSF website (<http://www.nsf.org>). The NSF Registration Mark can be downloaded from the NSF website, at http://www.nsf.org/business/about_NSF/nsf_marks_download.asp.

NSF Listing of all registered Nonfood compounds by NSF International is not an endorsement of those compounds, nor any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF web site, at <http://www.nsf.org>. Changes in formulation or without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

Carmen Grindatti
