

# Stainless Steel Cleaner & Polish

## PRODUCT DESCRIPTION:

JAX Stainless Steel Cleaner & Polish is compounded with a unique formula that polishes, cleans and shines stainless steel, Plexiglas®, copper, and many other high-luster metals with a minimum amount of "elbow grease." JAX Stainless Steel Cleaner & Polish does not leave a film or oily residue and helps prevent water spotting and staining. It makes stainless surfaces shine like new!

## APPLICATION:

JAX Stainless Steel Cleaner & Polish is A7-registered by NSF for use in federally-inspected facilities. Features of this product include:

- Repels water - beads up like wax
- Provides high-gloss protective shield
- Dissolves tarnish
- Rubs in completely, with no dust or residue
- Can be used on glass, chrome and vinyl
- Provides UV protection to painted surfaces, plastics and fiberglass

For best results use JAX Stainless Steel Cleaner & Polish as you would a car polish — apply, rub in and around to accomplish the cleaning and surface preparation. Then go back over with a dry cloth to shine and remove any streaks.

## TECHNICAL DATA:

Propellant:	Propane and n-Butane
Flash Point:	> 250°F (121°C) No Flame Projection
Spray Pattern:	Medium Mist
Viscosity:	N/A
Texture:	Thick Creamy Film
Appearance:	White
Consistency:	Medium
Specific Gravity:	0.952 for Concentrate

## AEROSOL PACKAGING:

14 oz. net weight aerosol cans (12/case) — Part # JAX123

# Stainless Steel Cleaner

NSF International / Nonfood Compounds Registration Program

RE: JAX STAINLESS STEEL CLEANER & POLISH (Aerosol)  
Category Code: A7  
NSF Registration No. 133885

Dear Ms. Patty Riek:

NSF has processed the application for Registration of **JAX STAINLESS STEEL CLEANER & POLISH (Aerosol)** to the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2004), which are available at <http://www.nsf.org>. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling.

**This product is acceptable as a metal cleaner and polisher for nonfood contact surfaces (A7) in and around food processing areas. All food products and packaging materials shall be removed or carefully protected prior to usage. This compound must be used in a manner so that all odors associated with the compound are dissipated before food products or packaging materials are re-exposed in the area.**

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, and the registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (<http://www.nsf.org>). The NSF Registration Mark can be downloaded from the NSF website, at [http://www.nsf.org/business/about\\_NSF/nsf\\_marks\\_download.asp](http://www.nsf.org/business/about_NSF/nsf_marks_download.asp).

NSF Listing of all registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF web site, at <http://www.nsf.org>. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

Carmen Grindatti  
NSF Nonfood Compounds Registration Program
