

WLTB White Lift Truck & Boom

PRODUCT DESCRIPTION:

JAX WLTB White Lift Truck and Boom is formulated especially for forklifts that operate in a food, beverage or pharmaceutical processing area. Also, since JAX WLTB is white it is the best choice for material handling customers who deal with white-painted lift equipment. It's a very tacky and adhesive combination of two proven JAX food-grade greases and was developed to answer direct requests from our customers.

PRODUCT BENEFITS:

JAX WLTB White Lift Truck & Boom combines the body and adhesion characteristics of JAX Gear-Guard FG and JAX Halo-Guard FG-LT to create a spray grease that performs as well as its non-food-grade counterpart JAX Lift Truck & Sliding Tandem Lube. In addition to its long-lasting, hard-to-wash-off, non-drip performance, JAX WLTB is a white, food-grade product.

APPLICATIONS:

Telescoping boom cranes: These machines need a lubricant that's easily sprayed, long-lasting, and non-drip to apply to the bottom (contact) portion of the boom when extended. This ensures a non-jerky, no-bind, reduced-wear operation. Also, since many cranes are painted white, JAX WLTB is an excellent solution since it's able to provide the same performance as a dark lubricant, but without the mess.

Lift Trucks: Many processing areas are exclusively using food-grade lubricants throughout the plant, and since a fork lift moves throughout the plant and through plastic screens, the potential exists for the lubricant to come in contact with your product. Use this food-grade lubricant on vertical rails and side-to-side shifting gear to keep rollers rolling and eliminate wear.

TECHNICAL DATA:

Propellant:	Propane and Butane
Spray Pattern:	Medium Stream
Texture:	Creamy White Grease with Fine Particulates
Appearance:	White Grease
Consistency:	Heavy
Specific Gravity:	0.83-0.88 for Concentrate, typical

AEROSOL PACKAGING:

11 oz. net weight aerosol cans (12/case) – Part # JAX143

RE: JAX WLTB White Lift Truck & Boom (AEROSOL)
Category Code: H1
NSF Registration No. 140945

Dear Ms. Patty Riek:

NSF has processed the application for Registration of **JAX WLTB White Lift Truck & Boom (AEROSOL)** to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2008), which are available at www.nsfwhitebook.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

This product is acceptable as a lubricant with incidental food contact (H1) for use in and around food processing areas. Such compounds may be used on food processing equipment as a protective anti-rust film, as a release agent on gaskets or seals of tank closures, and as a lubricant for machine parts and equipment in locations in which there is a potential exposure of the lubricated part to food. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust film, the compound must be removed from the equipment surface by washing or wiping, as required to leave the surface effectively free of any substance which could be transferred to food being processed.

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, and the Registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (www.nsfwhitebook.org). The NSF Registration Mark can be downloaded by clicking the "Download Registration Mark" link on the NSF website (www.nsfwhitebook.org).

NSF Listing of all Registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at www.nsfwhitebook.org. Changes in formulation or label, without the prior written consent of NSF, will void Registration, and will supersede the on-line listing.

Sincerely,

Jennifer De France
