

# COMBI WAX

## 77B

Rev. 24/04/2002

### Product Description

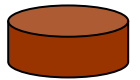

DINITROL COMBI WAX is an underbody protection for vehicles, also suitable as transport protection under corrosive circumstances. Provides a hard, thick, light brown and waxy film which ensures long term corrosion protection as well as protection against mechanical abrasion. The product contains low aromatic solvent.

### Application

Apply by spraying with DINITROL manual and semi-automatic equipment. DINITROL COMBI WAX is also suitable for either airmix or airless spraying.

#### Technical Data
